

J.Busilacchio Organ

Thank you for purchasing the J.Busilacchio Organ VST instrument.

We managed to get hold of this quirky and classy electric powered organ/harmonium and sampled every note from it. There are options to use just the chord buttons, or a mix of the chords and keys. We have even sampled the key clicks and the fan noise for more authenticity.

It is basically a keyboard accordion but instead of the player controlling the bellows, the electric fan does it for you. You have major, minor and seventh chords to use or you can simply use the bass notes whilst playing your melody on the keys.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

Finally, may we ask you to please not illegally share, duplicate or modify this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.
