Thank you for purchasing this Yamaha DJX Set VST instrument.

The DJX keyboard was introduced in the late 1990s to satisfy the budding Dance, Trance, Techno & Hip Hop producers. There is a wide pallette of 155 Presets on the actual DJX along with the standard 128 General MIDI soundset.

The DJX VST comes in 2 volumes (which can be purchased separately). Set 1 contains all presets '000' through to '078 & Set 2 contains the rest of the sounds & drum kits up to patch '155'. The GM sounds have been left out as there are many GM VSTs on the market, but all the juicy presets are here all wrapped up in a simple interface so you can get programming your dance tracks immediately. A Low Pass Filter is included along with Reverb.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.
To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.
For Logic and Sierra users, please download the installation guide which includes the OSX Validation Tool. It can be found on the VST instruments page of the Beat Machine website.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to sales@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*
