Linn
LM-1 Drum Computer

Thank you for purchasing this Linn LM-1 VST instrument.

The Linn LM-1 Drum Machine has been responsible for producing the drum tracks on countless classic songs throughout the 80s. From Prince and Michael Jackson to the Bee Gees and Stevie Wonder, the LM-1 is a sure favourite to those of us who grew up listening to this glorious 8bit charm.

In this VST you get all of the great samples from the LM-1 plus a Prince and Michael Jackson drum kit which include the actual LM-1 samples from the artist master tracks. Pure authenticity for under six quid!

A nice and easy to use GUI so that you can get producing in seconds.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.
To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.
For Logic and Sierra users, please download the installation guide which includes the OSX Validation Tool. It can be found on the VST instruments page of the Beat Machine website.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*
