

NINETEEN84

Thank you for purchasing the Nineteen 84 VST instrument.

This is the 5th addition to the popular 80s series of VST instruments. In this VST you will get all of the drum kits, basses and sounds to recreate three classic 80s tracks perfectly. The demonstrations are made ONLY with this VST instrument and nothing else. I have included my MIDI data too so you can get up and running quickly. I have also included a screen shot of the mixer, so you can add the correct audio tools and effects.

Every included sound has been meticulously sampled and mapped across the keyboard. You can manipulate the sound envelope and control gain like on the actual synth.

A Low Pass Filter is now included along with Reverb.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.

For Logic and Sierra users, please download the installation guide which includes the OSX Validation Tool. It can be found on the VST instruments page of the Beat Machine website.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*
