Thank you for purchasing the Yamaha PSS140 VST instrument.

The Yamaha PSS140 is a keyboard that will pull a few heart strings as it was the first keyboard for many of us back in the 80s. In this VST you get all 100 sounds along with the 10 rhythms which are switchable from the buttons. The drum pads trigger the drum samples and there's even the original demo button.

Every included sound has been meticulously sampled, stacked and mapped across the keyboard. You can manipulate the sound envelope, adust the filter sweep using the Hi Pass or Low Pass options, change the poly mode to monophonic and add portamento if rerquired. Reverb is also included.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will ask you for your serial number. Please input the number making sure not to copy any spaces at the end. It will then be automatically be integrated within your setup.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*
