Thank you for purchasing this Yamaha RX VST instrument.

This VST drum machine includes the superb Yamaha RX5, RX7, RX8, RX11, RX15, RX17, RX21, RX21L (Latin Version) & the RX120 drum machines. There is a short looped demo for each drum machine which you can simply toggle on & off by pressing the blue button. The Panic button will release any stuck notes if you were to end up with a bottleneck of MIDI information.

The RX drum machine family give you a wide variety of percussive sounds that will energise any drum track.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.
To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.
For Logic and Sierra users, please download the installation guide which includes the OSX Validation Tool. It can be found on the VST instruments page of the Beat Machine website.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*
