# TR88

Thank you for purchasing this TR88 VST instrument.

The TR88 contains all 16 kits from the awesome Roland TR8 drum machine. The two groundbreaking drum machines, the TR808 & TR909 are here in true clarity.
We had the pleasure of using a TR8 for 24 hours to get every hit sampled at the usual high quality.

By clicking on one of the 16 'Kit Select' buttons you can quickly select any of the 16 kits just like on the real TR8. You have reverb, High/Low Pass filters and the option for polyphonic or monophonic playback.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.

For Logic and Sierra users, please download the installation guide which includes the OSX Validation Tool. It can be found on the VST instruments page of the Beat Machine website.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*
