

Thank you for purchasing this AKAI S950 80s Vol1 Drum Rack VST instrument.

One of my well loved bits of kit was my S950. Sadly, not used anymore, but I have converted a load of my S950 sample disks and created a tidy Drum Rack VST for you to enjoy in your productions.

In this 80s Drum Kit Series VST you get 8 drum kits covering multiple artists such as Alexander O’Neal, Aretha Franklin, Phil Collins, Irene Cara and more. I’ve even thrown in the Criticize Bass & MIDI drum information. This S950 VST has a nice simple to use GUI with a very effective effects engine should you wish to add a ton of grit & chorus to those 12bit samples!

- Alexander O Neal Kit
- Aretha Franklin - Waiting For Me Kit
- Aretha Franklin - Zoomin Who Kit
- Phil Collins - Air Tonight Kit
- Irene Cara Kit
- Lost Boys Kit
- Pat Benatar Kit
- Strawberry Switchblade Kit
- Criticize Bass

**NOTE: Please place the included fonts into you ‘FONTS’ folder on your computer. This will show the correct display like what is shown above. To install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.**

**This instrument is VST 3 ready and available for Mac users.**

Here is a short video showing how to get up & running quickly in Windows...
