

SN CARD COLLECTION

Thank you for purchasing this 'Ronald' SN Series Sound Library Card VST instrument.

There are many great cards to choose from and they contain some great sounds for you to use in your productions. Each card VST is sold separately. We currently have all but two of the Sound Library Cards, so if you can help with cards 11 & 13 to complete the collection, please get in touch!!;-)

You **do not** require the U110 VST to run these Sound Library Cards as they are all individual VST instruments.

A Low Pass Filter is now included along with Reverb.

Many thanks to Audun Rødsten for sending the SN soundcards all the way from Norway for me to convert!;-)

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.

For Logic and Sierra users, please download the installation guide which includes the OSX Validation Tool. It can be found on the VST instruments page of the Beat Machine website.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*
