

Thank you for purchasing the Yamaha SY22 Internal Voice VST instrument.

Due to the amount of patches and the level of multi, high quality samples, the SY22 VST instrument comes in 2 volumes. This is Volume 2 which contains all 64 presets of the SY22's Internal Voice Bank. The synth has been sampled across the key range and many of the notes are long and evolve over time. Anyone who knows the SY22 or TG33, will know just how impressive this synth really is.

Every included sound has been meticulously sampled and mapped across the keyboard. You can manipulate the sound envelope, pan and control gain. Reverb & Pitch controls are also included. If you want to adjust the cut-off and resonance of a sound, you can do this within your DAW using envelopes. The current software limitations prevents me from adding cut-off & resonance controls.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*

PATCH LIST

Group List

✓ 11-SP Warm	51-BR Punch
12-MovieTrk	52-BR Power
