

Thank you for purchasing this Take On Me VST instrument.

Take On Me is a-ha's biggest single and has broken all records for the amount of plays for a single on YouTube. I wanted to recreate every drum hit & sound for the song and then record every track from scratch to recreate this timeless classic. The result is a ridiculous amount of hard work in a VST for the usual affordable price.

The Cubase & MIDI file information are also included which sync with the VST.

Only the vocal track was used from the original master tracks. Everything that you hear in the demo is the VST & many hours of programming. I'm sure you will agree with the accuracy of the sounds & recording.

Add an LFO Depth of 20 to the Bell track & an LFO Depth of 12 to the EP Pad for authenticity.

Drum Kit

Take On Bass

Take On Pluck

Take On Bell

Take On Flute

Take On Lead Synth

Take On Brass

Take On Pad

Take On Ana Pad

Take on EP Pad

Take On EP

Take On Silk Pad

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will ask you for your serial number. Please input the number making sure not to copy any spaces at the end. It will then be automatically be integrated within your setup. Mac users, please see the website for more info.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to hello@beatmachine.co.uk or find us on Facebook.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases.*

Thank you.
