

Thank you for purchasing this West End Girls VST instrument.

West End Girls was the first hit for the Pet Shop Boys and major breakthrough for their awesome music. This VST has literally taken months of sample collecting and sound design. Drum kits and sounds have been produced for the Radio edit, the original Bobby Orlando Mix and the awesome Disco Mix of the track. The MIDI file information is also included that I have created especially to demonstrate the closeness of the drums and sounds in this VST. And again, it's all for less than a the price of a couple of drinks.

Every included sound has been meticulously sampled/created and mapped across the keyboard. You can manipulate the sound envelope, adjust the LFO, Pan, Pitch, add reverb and even use the high pass filter.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.

For Logic and Sierra users, please download the installation guide which includes the OSX Validation Tool. It can be found on the VST instruments page of the Beat Machine website.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*
