

# YAMAHA Electone EL-90

Thank you for purchasing the Yamaha EL90 VST Instrument.

Back in the early 1990s, I used to sell these flagship organs for around £10,000. Recently I have had the pleasure of gaining access to one for a few days. So I spent the time sampling all of the sounds, including the drum kit and I have wrapped them all up into a tidy VST. All of the EL90 sounds are there.

You get two VST instruments covering the entire EL90 for the one small price.

Every included sound has been meticulously sampled, edited, looped and mapped across the keyboard. You can manipulate the sound envelope, pitch and control gain like on the actual synth. Reverb and pitch control are also included.

**NOTE: Please place the included fonts into your 'FONTS' folder on your computer. This will show the correct display like what is shown above.**

**To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, input your unique serial number and it will automatically be integrated within your setup.**

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to [info@beatmachine.co.uk](mailto:info@beatmachine.co.uk) or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*
